

PERFORMANCE

powered by INFUSIO®

OPTIMAL RESULTS

An athlete's most valuable asset is their body. To gain maximum results your body has to be in optimal condition. Injuries, malnutrition and compromised body mechanisms can cause your performance to suffer. PERFORMANCE® utilizes INFUSIO®'s most natural methods of healing and cutting-edge science to optimize performance:

Regenerate/Repair Tissues

Restore Function

Replenish Vital Nutrients

Accelerate Recovery Time

Avoid Surgery

Our custom programs are individually designed by our team of physicians, bio-mechanical experts, therapists, nurses and nutritionists which utilize stem cells coupled with oxygen therapies, light therapies, and IV treatments. These modalities promote tissue repair, cell regeneration to improve the overall metabolism, circulation and cell function so athletes can reach new limits and perform at their peak.

Give yourself the opportunity to become stronger, leaner, faster, and improve overall performance by adopting a revolutionary approach to fitness and health by PERFORMANCE® - a worldwide leader in regenerative therapy.

RECOVERY

CONCUSSION
TREATMENT

Combat joint pain and heal damaged connective tissue without surgery. PERFORMANCE® uses cutting-edge, safe, proven regenerative medicine to regain mobility and rebuild deteriorated cartilage with adult stem cells, the body's most powerful natural healer. Read more about our Joint Program on page 5.

It's time to break the glass ceiling. You've committed to training hard, eating right, now it's time to let PERFORMANCE® take your body to the next level with our 360 degree approach to fitness optimization. Are you ready to kick it up a notch? Continue reading on page 13.

Training hard comes with its consequences. Injuries can put a strain on your fitness regimen or worse, put athletes on the sidelines. Our Recovery Program is right for you if you want to support your body's healing capacity in the most natural way. Find more information on page 17.

A concussion is the most common sports-related traumatic brain injury and the most dangerous considering its seemingly invisible symptoms. Treatment options for athletes suffering from this silent killer have been limited - until now. PERFORMANCE® provides new and groundbreaking techniques to combat TBI. Read more on page 19.

ORTHOPEDIC REJUVENATION

Combat joint pain and heal damaged connective tissue without surgery. PERFORMANCE® uses cutting-edge regenerative medicine to regain mobility and rebuild deteriorated cartilage and other soft tissues with adult stem cells, the body's natural healer.

DON'T LET AGE STOP YOU FROM PERFORMING AT YOUR PEAK

Years of wear and tear on your joints can lead to chronic pain, cartilage degeneration, and interference with overall movement. We are able to heal these injuries naturally by using adult stem cells from the patient's own fat tissue. This activates the body's ability to regulate cell function, promote healing, and reduce inflammation.

ABOUT OUR
JOINT PROGRAM

JOINT REJUVENATION

Stay active for life. PERFORMANCE® aims to turn back the clock using INFUSIO®'s highly effective, scientifically backed approach. Our minimally invasive orthopedic stem cell injections increases the body's own natural repair cells to promote healing and reduce years of wear and tear. By harvesting stem cells from your own body and re-injecting them into damaged areas we can revitalize body functions without surgery or downtime.

Don't let age or trauma stop you from performing at your best.

HOW IT WORKS

Stem cells are essentially "blank" cells capable of morphing into other types of cells; They serve as a built-in repair mechanism. When a joint or muscle is injured, stem cells can replace and heal damaged cells, giving athletes the best possibility of regaining full functionality of their joints. We can achieve these results with a one time stem cell injection.

OUR TECHNIQUE

PERFORMANCE® uses Stromal Vascular Fraction (SVF), an extract derived from fat tissue, which contains stem cells as well as a whole array of other important cells, exosomes and growth factors. This minimally invasive procedure takes less than an hour and does not require sedation.

THE PROCESS

PERFORMANCE® specializes in lipoaspirate stem cell injections for joint restoration. The properties of this concentrate has the potential to give patients immediate pain relief and stimulate new cartilage production over time.

We use INFUSIO®'s 20 years of experience in stem cell therapies with scientifically proven results to deliver this safe, minimally invasive treatment option.

Fat tissue
is harvested
through a mini
liposuction
procedure

anesthesia

STUDY SHOWS 75% IMPROVEMENT

A study performed by Dr. Jaroslav Michalek in 2015 carried out with 1,114 osteoarthritis sufferers showed that adipose derived stem cells have the potential to regrow cartilage. After the application of a single autologous fat cell transplant the patients were followed for between 12 and 54 months. At least a 75 percent score improvement was noticed in 63 percent of the patients and at least a 50 percent score improvement was documented in 91 percent of the patients after 12 months, said the researchers. Typically patients in the study consumed large amounts of painkillers for their symptoms. Researchers found that painkiller usage declined dramatically after treatment.

Stem cells
begin the process
of repair and
regenerating
cartilage*

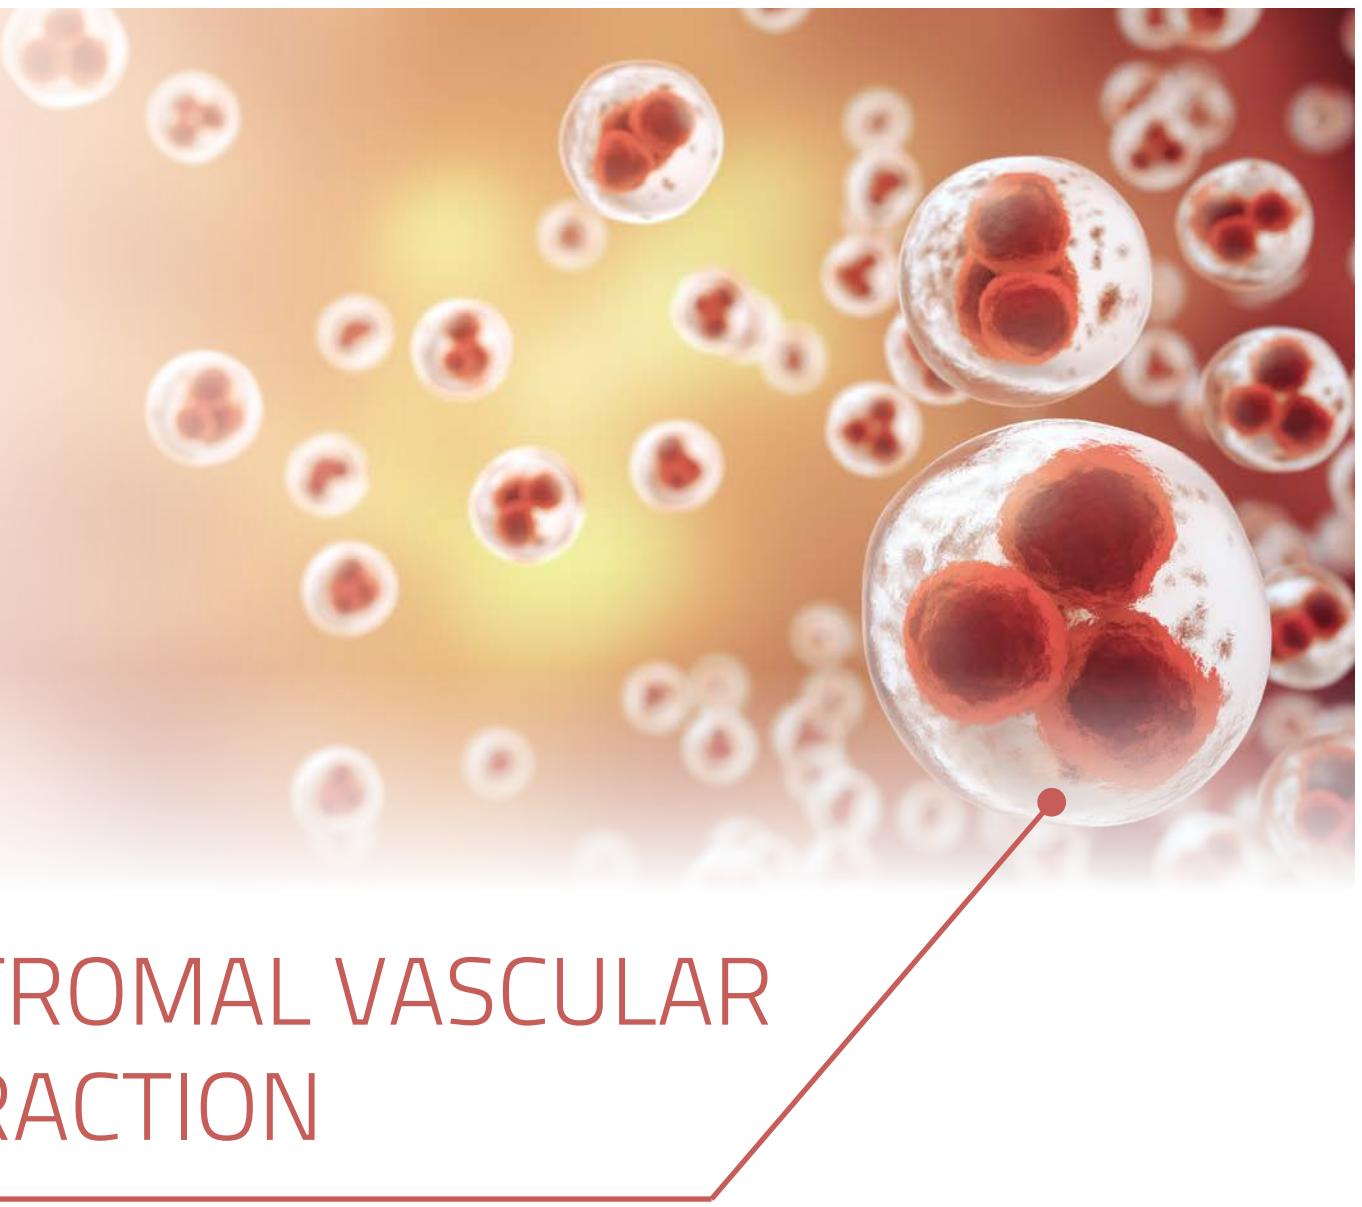

*Minimal downtime allows returning to regular activity usually after 48 hours. Manual therapy and Hyperbaric Oxygen Therapy are recommended for long term stabilization

STEM CELLS IN SPORTS MEDICINE

Stem cell therapy is revolutionizing the way doctors approach sports injuries. It is the most modern form of regenerative medicine for its potential to renew, repair, and regulate damaged tissues. This means fewer surgeries, faster recovery time, increased injury prevention, and relief from chronic pain.

STROMAL VASCULAR FRACTION

Stems cells are key to the human body's internal repair system. PERFORMANCE® uses an advanced form of stem cell therapy called Stromal Vascular Fraction (SVF). This multi-faceted substance contains hematopoietic (blood) stem cells, mesenchymal (fat) stem cells, growth factors, anti-inflammatory cells, and a wide array of other vital cells obtained from the patient's own fat tissue.

STROMAL VASCULAR FRACTION

What makes SVF superior to other stem cell therapies? In contrast to the application of singled out stem cells, the combination of stem cells, supportive cells and growth factors contained in SVF can provide a more versatile healing potential. The application of SVF intravenously triggers a systemic response, activating the body's ability to regulate cell function, promote

healing in deficient areas, while delivering an anti-inflammatory effect. When applied locally, it has the capability to regenerate various soft tissues to help repair spinal injuries, torn ligaments, menisci (knee joints), damaged rotator cuffs, and heal traumatic brain injuries. Studies also show improvements in cognition, thyroid function, and weight loss through SVF.

FITNESS OPTIMIZATION

MY BODY IS A TEMPLE

We understand that your body is a sanctuary, and it should be treated as such. PERFORMANCE® utilizes INFUSIO®'s scientific medical treatment methodology to optimize and strengthen pre-existing body mechanisms. This increases overall resilience to power up your fitness goals. You have made a commitment to your health and wellness, take these extra steps to maximize and perform at your peak.

OPTIMIZE

This program is designed to strengthen your body, to increase resilience, promote rapid recovery, and transcend your body's best. It is ideal for the elite athlete or fitness fanatic looking to bounce back more quickly and take your performance to the next level.

HOW IT WORKS

Optimization is a 30 day program which incorporates two treatments per week after a comprehensive assessment.

You can continue your normal workout regimen and nutrition plan while slowly introducing therapy. Your body will gradually build endurance and safely enhance your lasting results.

TREATMENTS

INTRAVENOUS THERAPY

Replace a broad range of vitamin deficiencies, boost vitamin levels in the body, and increase bio availability of essential nutrients directly through the blood stream.

HYPERBARIC OXYGEN THERAPY

HBOT increases the amount of oxygen delivered to your blood to promote healthy tissue function, decrease healing time, minimize injury and help fight infection.

PHOTOBIOMODULATION

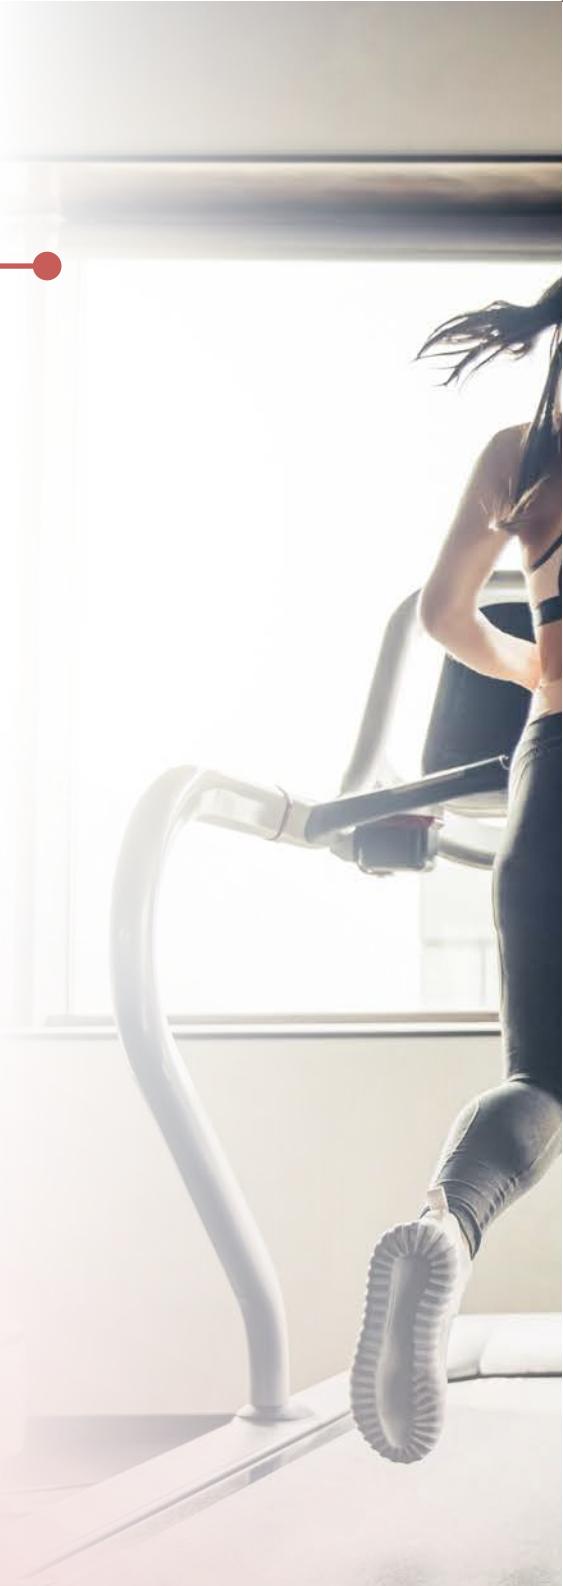

Deliver infrared light to the body to encourage cell growth to improve tissue repair, reduce oxidative stress, pain and inflammation.

TRIGGER POINT THERAPY

Relieve pain, promote deep muscle relaxation and blood circulation while stimulating muscle and metabolic function to support healing.

MANUAL THERAPY

Increase range of motion, reduce pain, decrease swelling or inflammation, and assist the body in muscle or soft tissue repair by facilitating the passive movement of joints to improve full functionality.

INJURY RECOVERY

Training hard comes with its consequences. Injuries can put a strain on your fitness regimen or worse, put athletes on the sidelines.

The goal of Injury Recovery by PERFORMANCE® is to heal injuries to get you back in the game while avoiding surgery and reducing downtime. We use cutting-edge science and foundational medicine to help you regain your competitive edge.

HOW IT WORKS

Injury Recovery is a 5-10 day customized plan to treat individual injuries. Our modalities promote cell regeneration to improve damaged cells, accelerate the healing process and enhance overall body mechanisms. These techniques will also strengthen and build joint and muscle tissue to increase overall resilience and avoid future injuries.

TREATMENTS

INTRAVENOUS THERAPY

Replace a broad range of vitamin deficiencies, boost vitamin levels in the body, and increase bio availability of essential nutrients directly through the blood stream.

HYPERBARIC OXYGEN THERAPY

Hyperbaric Oxygen Therapy decreases the amount of oxygen delivered to your blood to promote healthy tissue function, increase healing time, minimize injury and help fight infection.

PHOTOBIOMODULATION

Deliver infrared light to the body to encourage cell growth to improve tissue repair, reduce pain and inflammation.

TRIGGER POINT THERAPY

Relieve pain, promote deep muscle relaxation and blood circulation while stimulating muscle and metabolic function to support healing.

NUTRITIONAL CONSULT

Fuel your body with a customized nutrition plan to aid in healthy food choices and eating habits to maximize your well-being, weight and performance.

MANUAL THERAPY

Increase range of motion, reduce pain, decrease swelling or inflammation, and assist the body in muscle or soft tissue repair by facilitating the passive movement of joints to improve full functionality.

SVF CELL THERAPY

PERFORMANCE® uses Stromal Vascular Fraction (SVF), an extract derived from fat tissue, which contains stem cells as well as a whole array of other supportive cells, exosomes and growth factors. This minimally invasive procedure takes less than an hour and does not require anesthesia.

CONCUSSION

A concussion is the most common sports-related brain injury and the most dangerous considering its seemingly invisible side effects.

In 2013, about 2.8 million Traumatic Brain Injury (TBI) related emergency department visits, hospitalizations, and deaths occurred in the United States. Studies have exposed the severity of these traumatic brain injuries proving concussions cause brain damage responsible for memory loss, mood swings, seizures, and more debilitating effects that can be felt decades after the initial hit.

The Concussion Program combats traumatic brain injuries head-on, making immediate alleviation and long-term prevention and recovery a priority. By using the latest evolution of science and medical methodology, stem cell therapy, and natural alternatives, we can aid in the healing of concussion damage while restoring and optimizing your brain function and overall health.

3 MILLION CASES EACH YEAR

NFL players have been the most prominent cases of the negative long-term effects of untreated concussions. The New York Times reported that 110 out of 111 brains NFL players suffered from Traumatic Brain Injury.

According to the National Institute for Occupational Safety and Health, it is expected that one third of NFL retired players will develop long-term cognitive problems.

Athletes with concussions are 4x more likely to develop Alzheimer's and ALS, and to live shorter lives (average age at death being 57 years old).

CONSEQUENCES OF CONCUSSION

- ▶ Post-Concussion Syndrome (PCS)
- ▶ Hydrocephalus
- ▶ CSF Leakage
- ▶ Strokes
- ▶ Cognitive Disabilities
- ▶ Impairment of Senses
- ▶ Emotional and Behavioral Problems
- ▶ Life long neurological defects
- ▶ Increase likelihood of developing Alzheimers and ALS

ABOUT OUR
CONCUSSION
PROGRAM

CONCUSSION

HOW THE PROGRAM WORKS

The program is over the course of 30 days and begins with our Stromal Vascular Fraction (SVF) procedure. This fat tissue derived extract contains stem cells, an array of other supportive cells, exosomes, and growth factors. The patient continues with Hyperbaric Oxygen therapy twice a week. We combine this with IV therapy, Trigger Point therapy, Photobiomodulation, Ozone therapy, Immune Modulation, and Prolozone therapy.

TREATMENTS

INTRAVENOUS THERAPY

Replace a broad range of vitamin deficiencies, boost vitamin levels in the body, and increase bio availability of essential nutrients directly through the blood stream.

HYPERBARIC OXYGEN THERAPY

Hyperbaric Oxygen Therapy has shown great potential in neuroprotection and neurogenesis. It can help restore damaged brain cells or repair your brain. Increase the amount of oxygen delivered to your blood to promote healthy tissue function, decrease healing time, minimize injury and help fight infection.

PHOTOBIMODULATION

Deliver infrared light to the body to encourage cell growth to improve tissue repair, reduce oxidative stress, pain and inflammation.

10 PASS OZONE THERAPY

Promote the release of stem cells by oxygenating your blood to heal faster, reduce symptoms associated with depression, increase energy levels, sleep quality and a variety of other medical conditions.

IMMUNE MODULATION

Restore a healthy ratio of the various immune cells to enable the immune system to function in a coordinated fashion.

MIND-BODY MEDICINE

Theta technology, craniosacral therapy, osteopathic treatments are just some examples of what we use to reduce the symptoms of concussion. These forms of healing modalities aid in restoring brain pathways and assist the patient's emotional state.

TRIGGER POINT THERAPY

Relieve pain, promote deep muscle relaxation and blood circulation while stimulating muscle and metabolic function to support healing.

SVF CELL THERAPY

PERFORMANCE® uses Stromal Vascular Fraction (SVF), an extract derived from fat tissue, which contains stem cells as well as a whole array of other supportive cells, exosomes and growth factors. Studies have shown that SVF has anti-inflammatory and immune modulatory benefits in TBI patients. The stem cells contained in it have shown to contribute to neuron and brain tissue regrowth.
